AN ACT RELATIVE TO PATIENT SAFETY.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

SECTION 1. Chapter 6A of the General Laws is hereby amended by inserting after section 16G the following section:—

Section 16H. A nursing advisory board is hereby established within, but not subject to, the control of the executive office of health and human services. The advisory board shall consist of 8 members who shall have a demonstrated background in nursing or health services research and who shall represent the continuum of health care settings and services, including, but not limited to, long-term institutional care, acute care, community-based care, public health, school care, and higher education in nursing. The members shall be appointed by the governor from a list of 10 individuals recommended by the board of registration in nursing and a list of 10 persons recommended by the Massachusetts Center for Nursing, Inc. The advisory board shall elect a chair from among its members and adopt bylaws for its proceedings. Each of the 8 members appointed by the governor, shall serve for a term of 3 years, except that in making his initial appointments, the governor shall appoint 2 members to serve for a term of 1 year, 2 members to serve for a term of 2 years, 4 members to serve for a term of 3 years. Persons may be appointed to fill vacancies who shall serve for the unexpired term. No member shall serve more than 2 consecutive full terms.

The advisory board shall:—

(a) advise the governor and the General Court on matters related to the practice of nursing, including the shortage of nurses across the
Commonwealth in all settings and services, including long-term institutional care, acute care, community-based care, public health, school care, and higher education in nursing;
(b) develop a research agenda, apply for federal and private research grants, and commission and fund research projects to fulfill the agenda;
(c) recommend policy initiatives to the governor and the general court;
(d) prepare an annual report and disseminate the report to the governor, the general court, the secretary of health and human services, the director of labor and workforce development and the commissioner of public health; and
(e) consider the use of current government resources, including, but not limited to, the Workforce Training Fund as provided for time to time in the General Appropriations Act.
Any funds granted to the advisory board shall be deposited with the state treasurer and may be expended by the advisory board in accordance with the conditions of the grants, without specific appropriation. The advisory board may expend for services and other expenses any amounts that the General Court may appropriate. The advisory board shall conduct at least 1 public hearing during each year.

SECTION 2. Section 14 of Chapter 13 of the General Laws, as appearing in the 2006 Official Edition, is hereby amended by striking out, in line 35, the word “and”, and by inserting after the word “nursing”, in line 37, the following:— ; and (l) establish an expert nursing corps, to be known as the Clara Barton Expert Nursing Corps, which shall consist of recognized nurses of high achievement in the profession who shall mentor incoming or novice nurses and further the goals of the nursing profession; provided however, that the board shall adopt guidelines governing the implementation of the program; provided further, that such guidelines shall include, but not be limited to, the following provisions:— specialty, standing, experience, and successful efforts to enable the nursing profession.

SECTION 3. Chapter 15A of the General Laws is hereby amended by inserting after section 15F the following section:
Section 15G. Notwithstanding any general or special law to the contrary, any state or community college, or the University of Massachusetts may enter into employment contracts for a minimum period of 5 years with faculty members who teach nursing at such institutions, unless both parties agree to a shorter term of employment. For the purpose of this section in order to preserve the public’s health and safety, any nursing faculty positions made vacant by the retirement of any employee receiving benefits in accordance with this section, shall be deemed a position of critical and essential nature and shall be included on the schedule provided by the board of higher education to the house and senate committee on ways and means as set forth in this section.

SECTION 4. Said Chapter 15A is hereby further amended by inserting after Section 19E the following 6 sections:—

Section 19F. The board shall establish a student loan repayment program and a faculty position payment program, for the purpose of encouraging outstanding students to work in the profession of nursing or for existing nurses or nurse student graduates to teach nursing within the Commonwealth by providing financial assistance for the repayment of qualified education loans or by providing compensation to health care facilities to cover nurse scheduled work time spent teaching. The board of higher education shall adopt guidelines governing the implementation of the program, which shall include, but not be limited to, eligibility, repayment schedules and fair practice measures.

Section 19G. The board shall provide grants to institutions of higher education and health care institutions in the Commonwealth for the purpose of fostering partnerships between higher education institutions and clinical agencies that promote the recruitment and retention of nurses. Such grants may also be made available to such institutions for the purpose of establishing and maintaining nurse mentoring or nursing internship programs. The board shall adopt guidelines governing the awarding of these grants.

Section 19H. The board shall establish the Clara Barton Scholarship Program to provide students in approved Massachusetts colleges, universities and schools of nursing with scholarships for tuition and fees for the purpose of encouraging outstanding Massachusetts students to work as nurses in, but not limited to, acute care
The board of higher education shall adopt guidelines governing the implementation of the Clara Barton Scholarship Program. Colleges, universities, and schools of nursing in the Commonwealth may administer the Clara Barton Scholarship Program and select recipients in accordance with guidelines adopted by the board. Scholarships may be made available to full or part time matriculating students in courses of study leading to a degree in nursing or the teaching of nursing. The criteria of the recipients and the amount of the scholarships shall be determined by the board of higher education.

Section 19I. The board shall develop a program to provide matching grants to any hospital that commits resources or personnel to nurse education programs. Such program shall provide a dollar-for-dollar match for any funds committed by a hospital to pay for nurse faculty positions in publicly funded schools of nursing, including the costs of providing hospital personnel loaned to said schools of nursing.

Section 19J. The board shall appropriate a portion of the Clara Barton Nursing Excellence Trust Fund, established in Section 2YYY of Chapter 29, to be used for refresher courses and retraining at accredited schools of nursing for licensed registered nurses returning to bedside care.

Section 19K. The board shall develop a program to increase the racial and ethnic diversity of the nursing workforce. The program shall focus on the identification, recruitment and retention of nursing students from populations underrepresented in the health care professions and shall pay special attention to economic, social, and educational barriers for the diversification of the nursing workforce.
as the fund. There shall be credited to the fund all revenues from public, subject to appropriation, and private sources as appropriations, gifts, grants, donations, and from the federal government as reimbursements, grants-in-aid or other receipts to further the purposes of the fund in accordance with Sections 19F to 19K, inclusive, of Chapter 15A, and any interest or investment earnings on such revenues. All revenues credited to the fund shall remain in the fund and shall be expended, without further appropriation, for the purposes of said sections 19F to 19K, inclusive of said Chapter 15A. The state treasurer shall deposit and invest monies in said fund in accordance with Sections 34, and 38 in such a manner as to secure the highest rate of return consistent with the safety of the fund. The fund shall be expended only for the purposes stated in said Sections 19F to 19K, inclusive, at the direction of the commissioner of higher education, established in Section 6 of said Chapter 15A.

On February 1 of each year, the state treasurer shall notify the advisory board established pursuant to Section 16H of Chapter 6A of any projected interest and investment earnings available for expenditure from said fund for each fiscal year.

SECTION 6. Chapter 111 of the General Laws is hereby amended by adding the following 9 sections:—

Section 221. As used in Sections 221 to 229, inclusive, the following words shall, unless the context clearly requires otherwise, have the following meanings:—

“Adjustment of standards”, the adjustment of nurse’s patient assignment standards in accordance with patient acuity according to, or in addition to, direct-care registered nurse staffing levels determined by the nurse manager, or his designee, using the patient acuity system developed by the department and any alternative patient acuity system utilized by hospitals, if said system is certified by the department.

“Acuity”, the intensity of nursing care required to meet the needs of a patient; higher acuity usually requires longer and more frequent nurse visits and more supplies and equipment.

“Assignment”, the provision of care to a particular patient for which a direct-care registered nurse has responsibility within the scope of the nurse’s practice, notwithstanding any general or special law to the contrary.
“Assist”, patient care that a direct-care registered nurse may provide beyond his patient assignments if the tasks performed are specific and time-limited.

“Board”, the board of registration in nursing.

“Circulator”, a direct-care registered nurse devoted to tracking key activities in the operating room.

“Department”, the department of public health.

“Direct-care registered nurse”, a registered nurse who has accepted direct responsibility and accountability to carry out medical regimens, nursing or other bedside care for patients.

“Facility”, a hospital licensed under section 51, the teaching hospital of the University of Massachusetts medical school, any licensed private or state-owned and state-operated general acute care hospital, an acute psychiatric hospital, an acute care specialty hospital, or any acute care unit within a state-operated facility. As used in sections 221 to 229, inclusive, this definition shall not include rehabilitation facilities or long-term acute care facilities.

“Float nurse”, a direct-care registered nurse that has demonstrated competence in any clinical area that he may be requested to work and is not assigned to a particular unit in a facility.

“Health Care Workforce”, personnel that have an effect upon the delivery of quality care to patients, including but not limited to, licensed practical nurses, unlicensed assistive personnel and/or other service, maintenance, clerical, professional and/or technical workers and other health care workers.

“Nurse’s patient limit”, the maximum number of patients assigned to each direct-care registered nurse at one time on a particular unit.

“Mandatory overtime”, any employer request with respect to overtime, which, if refused or declined by the employee, may result in an adverse employment consequence to the employee. The term overtime with respect to an employee, means any hours that exceed the predetermined number of hours that the employer and employee have agreed that the employee shall work during the shift or week involved.

“Monitor in moderate sedation cases”, a direct-care registered nurse devoted to continuously monitoring his patient’s vital statistics and other critical symptoms.

“Nurse manager”, the registered nurse, or his designee, whose tasks include, but are not limited to, assigning registered nurses to
specific patients by evaluating the level of experience, training, and
education of the direct-care nurse and the specific acuity levels of
the patient.

“Nurse’s patient assignment standard”, the optimal number of
patients to be assigned to each direct-care registered nurse at one
time on a particular unit.

“Nursing care”, care which falls within the scope of practice as
defined in section 80B of chapter 112 or is otherwise encompassed
within recognized professional standards of nursing practice,
including assessment, nursing diagnosis, planning, intervention,
evaluation and patient advocacy.

“Overwhelming patient influx”, an unpredictable or unavoidable
occurrence at unscheduled or unpredictable intervals that causes a
substantial increase in the number of patients requiring emergent and
immediate medical interventions and care, a declared national or
state emergency, or the activation of the health care facility disaster
diversion plan to protect the public health or safety.

“Patient acuity system”, a measurement system that is based on
scientific data and compares the registered nurse staffing level in
each nursing department or unit against actual patient nursing care
requirements of each patient, taking into consideration the health
care workforce on duty and available for work appropriate to their
level of training or education, in order to predict registered nursing
direct-care requirements for individual patients based on the severity
of patient illness. Said system shall be both practical and effective in
terms of hospital implementation.

“Teaching hospital”, a facility as defined in section 51 that meets
the teaching facility definition of the American Association of Medi-
cal Colleges.

“Temporary nursing service agencies”, also known as the nursing
pool as defined in section 72Y, and as regulated by the department.

“Unassigned registered nurse”, includes, but not limited to, any
nurse administrator, nurse supervisor, nurse manager, or charge
nurse that maintains his registered nurse licensing certification but is
not assigned to a patient for direct care duties.

Section 222. The department shall reevaluate the numbers that
comprise the nurse’s patient assignment standards and nurse’s
patient limits and the patient acuity system in the evaluation period
and then every 3 years thereafter, taking into consideration evolving
technology or changing treatment protocols and care practices and other relevant clinical factors.

Section 223. (a) The department shall develop nurse’s patient assignment standards which shall be an ideal number of patients assigned to a direct-care registered nurse that will promote equal, high-quality, and safe patient care at all facilities. The standards shall form the basis of nurse staffing plans set forth in Section 225. The department shall use, at a minimum, the following information to develop nurse’s patient assignment standards for all facilities: (1) Massachusetts specific data, including, but not limited to, the role of registered nurses in the Commonwealth by type of unit, the current staffing plans of facilities, the relative experience and education of registered nurses, the variability of facilities, and the needs of the patient population; (2) fluctuating patient acuity levels; (3) variations among facilities and patient care units; (4) scientific data related to patient outcomes, a rigorous analysis of clinical data related to patient outcomes and valid nationally recognized scientific evidence on patient care, facility medical error rates, and health care quality measures; (5) availability of technology; (6) treatment modalities within behavioral health facilities; and (7) public testimony from both the public and experts within the field.

(b) The nurse’s patient assignment standards may be adjustable and flexible, as determined by the department, to consider factors, including but not limited to; varying patient acuity, time of day, and registered nurse experience. The number of patients assigned to each direct-care registered nurse may not be averaged. The nurse’s patient assignment standards may not refer to a total number of patients and a total number of direct-care registered nurses on a unit and shall not be factored over a period of time.

(c) The department shall develop nurse’s patient limits which represent the maximum number of patients to be safely assigned to each direct-care registered nurse at one time on a particular unit. The number of patients assigned to each direct-care registered nurse shall not be averaged and each limit shall pertain to only one direct-care registered nurse. Nurse’s patient limits shall not refer to a total number of patients and a total number of direct-care registered nurses on a unit and shall not be factored over a period of time. A facility’s failure to adhere to these nurse’s patient limits shall result
in non-compliance with this section and the facility shall be subject
to the enforcement procedures herein and Section 228.

(d) If the commissioner finds that, for any unit, the department
cannot arrive at a rationally based limit using available scientific
data, the commissioner shall report to: (1) the clerks of the house of
representatives and the senate who shall forward the same to the
speaker of the house of representatives, the president of the senate,
the chairs of the joint committee on public health, and the joint com-
mittee on state administration and regulatory oversight; (2) the com-
missioner of the division of health care financing and policy; and (3)
the nursing advisory board as defined in section 16H of chapter 6A,
the reasons for the department’s failure to arrive at a rationally based
limit and the data necessary for the department to determine a limit
by the next review period.

(e) The setting of nurse’s patient assignment standards and nurse’s
patient limits for registered nurses shall not result in the under-
staffing or reductions in staffing levels of the health care workforce.
The availability of the health care workforce enables registered
nurses to focus on the nursing care functions that only registered
nurses, by law, are permitted to perform and thereby helps to ensure
adequate staffing levels.

(f) Nurse’s patient assignment standards and nurse’s patient limits
shall be determined for the following departments, units or types of
nursing care:—

(1) intensive care units;
(2) critical care units;
(3) neo-natal intensive care;
(4) step-down or intermediate care;
(5) operating rooms, (i) not to include a registered nurse working
as a circulator (ii) to be determined for registered nurse working as a
monitor in moderate sedation cases;
(6) post-anesthesia care with the patient remaining under anes-
thesia or with a ;patient in a post-anesthesia state;
(7) emergency department overall;
(8) emergency critical care, provided that the triage, radio or other
specialty registered nurse is not included;
(9) emergency trauma;
(10) labor and delivery with separate standards for (i) a patient in active labor, (ii) patients, or couplets, in immediate postpartum, and (iii) patients, or couplets, in postpartum;

(11) intermediate care nurseries;

(12) well-baby nurseries;

(13) pediatric units;

(14) psychiatric units;

(15) medical and surgical;

(16) telemetry;

(17) observational or out-patient treatment;

(18) transitional care;

(19) acute inpatient rehabilitation;

(20) specialty care unit; and

(21) any other units or types of care determined by the department.

(g) The department shall jointly, with the department of mental health, develop nurse’s patient assignment standards and nurse’s patient limits in acute psychiatric care units. These standards and limits shall not interfere with the licensing standards of the department of mental health.

(h) Nothing in this section shall exempt a facility that identifies a unit by a name or term other than those used in this section, from complying with the nurse’s patient assignment standards and nurse’s patient limits and other provisions established in this section for care specific to the types of units listed.

Section 224. (a) The department shall develop a patient acuity system, as defined in Section 221. The department may also certify patient acuity systems developed or utilized by facilities. Patient acuity systems shall include standardized criteria determined by the department. The patient acuity system shall be used by facilities to:

(1) assess the acuity of individual patients and assign a value, within a numerical scale, to each individual patient;

(2) establish a methodology for aggregating patient acuity;

(3) monitor and address the fluctuating level of acuity of each patient;

(4) supplement the nurse’s patient assignments and indicate the need for adjustment of direct-care registered nurse staffing as patient acuity changes; and
(5) assess the need for health care workforce staff to ensure nurses’ focus on the delivery of patient care.

(b) The patient acuity system designed by the department or other patient acuity system used by a facility and certified by the department shall be used in determining adjustments in the number of direct-care registered nurses due to the following factors:

(1) the need for specialized equipment and technology;

(2) the intensity of nursing interventions required and the complexity of clinical nursing judgment needed to design, implement and evaluate the patient’s nursing care plan consistent with professional standards of care;

(3) the amount of nursing care needed, both in number of direct-care registered nurses and skill mix of members of the health care workforce necessary to the delivery of quality patient care required on a daily basis for each patient in a nursing department or unit, the proximity of patients, the proximity and availability of other resources, and facility design;

(4) appropriate terms and language that are readily used and understood by direct-care registered nurses; and

(5) patient care services provided by registered nurses and the health care workforce.

(c) The patient acuity system shall include a method by which facilities may adjust a nurse’s patient assignments within the limits determined by the department as follows:

(1) a nurse manager or designee shall adjust the patient assignments according to the patient acuity system whenever practicable as determined by need;

(2) a nurse manager or designee shall adjust the patient assignments when the department-developed or certified patient acuity system indicates a change in acuity of any particular patient to the extent that it triggers an alert mechanism tied to the aggregate patient acuity;

(3) a nurse manager or designee shall be responsible for realigning patients to comply with the patient acuity system, provided that the nurse manager may rearrange patient assignments within the direct-care registered nurses already under management and may also utilize an available float nurse;
(4) at any time, any registered nurse may assess the accuracy of the patient acuity system as applied to a patient in the registered nurse’s care. Nothing in this section shall supersede or replace any requirements otherwise mandated by law, regulation or collective bargaining contract so long as the facility meets the requirements determined by the department.

Section 225. As a condition of licensing by the department, each facility shall submit annually to the department a prospective staffing plan with a written certification that the staffing plan is sufficient to provide adequate and appropriate delivery of health care services to patients for the ensuing year. A staffing plan shall:—

(1) incorporate information regarding the number of licensed beds and amount of critical technical equipment associated with each bed in the entire facility; (2) adhere to the nurse’s patient assignment standards;

(3) employ the department-developed or facility-developed or any alternative patient acuity system developed or utilized by a facility and certified by the department when addressing fluctuations in patient acuity levels that may require adjustments in registered nurse staffing levels as determined by the department;

(4) provide for orientation of registered nursing staff to assigned clinical practice areas, including temporary assignments;

(5) include other unit or department activity such as discharges, transfers and admissions, and administrative and support tasks that are expected to be done by direct-care registered nurses in addition to direct nursing care;

(6) include written reports of the facility’s patient aggregate outcome data;

(7) incorporate the assessment criteria used to validate the acuity system relied upon in the plan; and

(8) include services provided by the health care workforce necessary to the delivery of quality patient care.

As a condition of licensing, each facility shall submit annually to the department an audit of the preceding year’s staffing plan. The audit shall compare the staffing plan with measurements of actual staffing, as well as measurements of actual acuity for all units within the facility assessed through the patient acuity system.
Section 226. (a) A direct-care registered nurse at the beginning of the nurse’s shift will be assigned to a certain patient or patients by the nurse manager, who shall use professional judgment in so assigning, provided that the number of patients so assigned shall not exceed the nurse’s patient limit associated with the unit.

(b) An unassigned registered nurse may be included in the counting of the nurse to patient assignment standards only when that unassigned registered nurse is providing direct care. When an unassigned registered nurse is engaged in activities other than direct patient care, that nurse shall not be included in the counting of the nurse to patient assignments. Only an unassigned registered nurse, who has demonstrated current competence to the facility to provide the level of care specific to the unit to which the patient is admitted, may relieve a direct-care registered nurse from said unit during breaks, meals, and other routine and expected absences.

(c) Nothing in this section shall prohibit a direct-care registered nurse from assisting with specific tasks within the scope of the nurse’s practice for a patient assigned to another nurse.

(d) Each facility shall plan for routine fluctuations in patient census. In the event of an overwhelming patient influx, said facility shall demonstrate that prompt efforts were made to maintain required staffing levels during the influx and that mandated limits were reestablished as soon as possible, and no longer than a total of 48 hours after termination of the event, unless approved by the department.

(e) For the purposes of complying with the requirements set forth in this section, except in cases of federal or state government declared public emergencies, or a facility-wide emergency, no facility may employ mandatory overtime.

Section 227. (a) No facility shall directly assign any unlicensed personnel to perform non-delegable licensed nurse functions to replace care delivered by a licensed registered nurse. Unlicensed personnel are prohibited from performing functions which require the clinical assessment, judgment and skill of a licensed registered nurse. Such functions shall include, but not be limited to:

(1) nursing activities which require nursing assessment and judgment during implementation;

(2) physical, psychological, and social assessment which requires nursing judgment, intervention, referral or follow-up;
(3) formulation of the plan of nursing care and evaluation of the
patient’s response to the care provided; (4) administration of medica-
tions; and (5) health teaching and health counseling.

(b) For purposes of compliance with this section, no registered
nurse shall be assigned to a unit or a clinical area within a facility
unless the registered nurse has an appropriate orientation in the clin-
ical area sufficient to provide competent nursing care and has
demonstrated current competency levels through accredited institu-
tions and other continuing education providers.

Section 228. (A) If a facility can reasonably demonstrate to the
department, with sufficient documentation as determined by the
appropriate entity, the attorney general or the division of health care
finance and policy, extreme financial hardship as a consequence of
meeting the requirements set forth in Sections 221 to 229, inclusive,
then the facility may apply to the department for a waiver of up to 9
months.

(B) As a condition of licensing, a facility required to have a
staffing plan under this section shall make available daily on each
unit the written nurse staffing plan to reflect the nurse’s patient
assignment standard and the nurse’s patient limit as a means of con-
sumer information and protection.

(C) The department shall enforce paragraphs (1) to (6), inclusive,
as follows:—

(1) If the department determines that there is an apparent pattern
of failure by a facility to maintain or adhere to nurse’s patient limits
in accordance with Sections 221 to 228, inclusive, the facility may
be subject to an inquiry by the department to determine the causes of
the apparent pattern. If, after such inquiry, the department deter-
mines that an official investigation is appropriate and after issuance
of written notification to the facility, the department may conduct an
investigation. Upon completion of the investigation and a finding of
noncompliance, the department shall give written notification to the
facility as to the manner in which the facility failed to comply with
Sections 221 to 228, inclusive. Facilities shall be granted due
process during the investigation, which shall include the
following:—

(a) notice shall be granted to facilities that are noncompliant with
Sections 221 to 228, inclusive; (b) facilities shall be afforded the
opportunity to submit to the department, through written clarifica-
tion, justifications for failure to comply with Sections 221 to 228, inclusive, if so determined by said department, including, but not limited to, patient outcome data and other resources and personnel available to support the registered nurse and patients in the unit, provided however, that facilities shall bear the burden of proof for any and all justifications submitted to the department;

(c) based upon such justifications, the department may determine any corrective measures to be taken, if any. Such measures may include:—

(i) an official notice of failure to comply;
(ii) the imposition of additional reporting and monitoring requirements;
(iii) revocation of said facility’s license or registration; and
(iv) the closing of the particular unit that is noncompliant.

(2) Failure to comply with limited nurse staffing requirements shall be evidence of noncompliance with this section.

(3) Failure to comply with the provisions of this section is actionable.

(4) If the department issues an official notice of failure to comply, as set forth in paragraph (1) of subsection (C) and subclause (i) of clause (c) of said paragraph (1) following submission to and adjudication by the department of justifications for failure to comply submitted by a facility pursuant to clause (b) of paragraph (1) of said subsection (C) to a facility found in noncompliance with limits, the facility shall prominently post its notice within each noncompliant unit. Copies of the notice shall be posted by the facility immediately upon receipt and maintained for 14 consecutive days in conspicuous places including all places where notices to employees are customarily posted. The department shall post the notices on its website immediately after a finding of noncompliance. The notice shall remain on the department’s website for 14 consecutive days or until such noncompliance is rectified, whichever is longer.

(5) If a facility is repeatedly found in noncompliance based on a pattern of failure to comply as determined by the department, the commissioner may fine the facility not more than $3,000 for each finding of noncompliance.

(6) Any facility may appeal any measure or fine sought to be enforced by the department hereunder to the division of administra-
tive law appeals and any such measure or fine shall not be enforced
by the department until final adjudication by the division.

(7) The department may promulgate rules and regulations neces­sary to enforce this section.

Section 229. The department of public health shall provide for (1)
an accessible and confidential system to report any failure to comply
with requirements of Sections 221 to 228, inclusive, and (2) public
access to information regarding reports of inspections, results, defi­ciencies and corrections under said Sections 221 to 228, inclusive,
unless such information is restricted by law or regulation. Any
person who makes such a report shall identify themselves and sub­stantiate the basis for the report; provided, however, that the identity
of said person shall be kept confidential by the department.

SECTION 7. The department of public health shall include in its
regulations pertaining to temporary nursing service agencies, or
nursing pools, as defined in section 72Y of chapter 111 of the
General Laws, and as regulated by the department, parameters in
which the department shall deny registration and operation of said
agencies only if the agency attempts to increase costs to facilities by
at least 10 per cent.

SECTION 8. Section 7 is hereby repealed.

SECTION 9. The department of public health shall submit 2
written reports on its progress in carrying out this act. Said depart­ment shall report to the general court the results of its 2 written
reports to the clerks of the house of representatives and the senate
who shall forward the same to the president of the senate, the
speaker of the house of representatives, the chairs of the joint com­mittee on public health. The first report shall be filed on or before
March 1, 2009 and the second report shall be filed on or before
December 1, 2010.

SECTION 10. The department of public health shall initially eval­uate the numbers that comprise the nurse’s patient assignment stan­dards and nurse’s patient limits set forth in Sections 221 to 228,
inclusive of Chapter 111 of the General Laws on or before Janu­ary 1, 2013.
SECTION 11. The department of public health, shall develop a comprehensive statewide plan to promote the nursing profession in collaboration with: the executive office of housing and economic development, the board of education, the board of higher education, the board of registration in nursing, the Massachusetts Nurses Association, 1199SEIU, the Massachusetts Hospital Association, Inc., the Massachusetts Organization of Nurse Executives Inc., and any other entity deemed relevant by the department. The plan shall include specific recommendations to increase interest in the nursing profession and increase the supply of registered nurses in the workforce, including recommendations that may be carried out by state agencies. The plan shall be filed with the clerks of the house of representatives and the senate, who shall forward the same to the president of the senate and the speaker of the house of representatives on or before April 15, 2009.

SECTION 12. Teaching hospitals, as defined in Section 221 of Chapter 111 of the General Laws, shall meet the applicable requirements of Sections 221 to 229, inclusive of said Chapter 111 of the General Laws on or before October 1, 2009. All other facilities, as defined in Section 221 of Chapter 111 of the General Laws, shall meet the applicable requirements of Sections 221 to 229, inclusive of said Chapter 111 of the General Laws no later than October 1, 2011.

SECTION 13. Section 8 shall take effect on December 1, 2014.

SECTION 14. The department of public health shall, on or before January 1, 2009, promulgate regulations defining criteria and prescribing the process for establishing or certifying by the department a standardized patient acuity system, as defined in Section 221 of Chapter 111 of the General Laws, developed or utilized by a facility as defined in said Section 221 of said Chapter 111.

SECTION 15. The department of public health shall, on or before March 1, 2009, develop a standardized patient acuity system or certify a facility developed or utilized patient acuity systems, as defined in Section 221 of Chapter 111 of the General Laws, to be utilized by
all facilities to monitor the number of direct-care registered nurses needed to meet patient acuity level.

SECTION 16. The department of public health shall, on or before June 1, 2009, establish, but not before the development or certification of standardized patient acuity systems, nurse’s patient assignment standards and nurse’s patient limits as defined in Section 221 of Chapter 111 of the General Laws.

SECTION 17. The department of public health shall, on or before June 1, 2009, promulgate regulations to implement the requirements of Section 229 of Chapter 111 of the General Laws.
